

AHERA Yearly Notification Form

Date: March 29, 2019

Dear Parents, Teachers, Building Occupants, and Employee Organizations:

In the past, asbestos was used extensively in building materials because of its insulating, sound absorbing, and fire retarding capabilities. Virtually any building constructed before the late 1970s contained some asbestos. Intact and undisturbed asbestos materials generally do not pose a health risk. Asbestos materials, however, can become hazardous when, due to damage or deterioration over time, they release fibers. If the fibers are inhaled, they can lead to health problems, such as cancer and asbestosis.

In 1986, Congress passed the Asbestos Hazard Emergency Response Act (AHERA) that requires schools to be inspected to identify any asbestos containing building materials. Suspected asbestos-containing building materials were located, sampled (or assumed) and rated according to condition and potential hazard. Every three years, Hillside School District has conducted a re-inspection to determine whether the condition of the known or assumed asbestos containing building materials (ACBM) has changed and to make recommendations on managing or removing the ACBM. At the last re-inspection, all materials listed in the Management Plan as asbestos containing (or assumed to be asbestos-containing) were inspected.

The law further requires an asbestos management plan to be in place by July 1989. Hillside School District developed a plan, as required, which has been continually updated. The plan has several ongoing requirements: publish a notification on management plan availability and the status of asbestos activities; educate and train its employees about asbestos and how to deal with it; notify short-term or temporary workers on the locations of the asbestos containing building materials; post warning labels in routine maintenance areas where asbestos was previously identified or assumed; follow set plans and procedures designed to minimize the disturbance of asbestos containing building materials; and survey the condition of these materials every six months to assure that they remain in good condition.

It is the intention of, Hillside School District to comply with all federal and state regulations controlling asbestos and to take whatever steps are necessary to ensure students and employees a healthy and safe environment in which to learn and work. You are welcome to review a copy of the asbestos management plan in school district administrative office or administrative office of the school during regular business hours.

Notification for AHERA Compliance Program

March 29, 2019

To Outside Contractors:

This notification serves to inform you of the presence of asbestos containing material in this school building. A Management Plan has been designed to include response actions that insure the ACM is kept in good condition. If you have been contracted for service that involves disturbing any ACM, please notify the Asbestos Program Manager. We ask that you provide us with a copy of your training certification to verify your knowledge of handling ACM. It is your responsibility as an outside contractor to supply your own protective clothing and respirators as deemed necessary.

If you wish to review the School's Management Plan, a copy is located in the School Administrative Office.
